

Turbocharger Warranty Statement

BBB warrants our **remanufactured** turbochargers to be free from defects in material and workmanship at the time of sale to the original purchaser for a period of 3 year or 36,000 miles. Remanufactured turbochargers must have proper installation procedures performed as outlined by the OE Manufacturer including:

- Oil and Oil Filter Replaced
- Air Filter Replaced

Warranty is void if the unit is improperly installed, or if the unit is damaged as a result of misdiagnosis of the vehicles system. Warranty applies only to catalog specific applications for personal use passenger cars, vans and light trucks. All fleet, commercial, heavy duty and industrial applications are warranted for a period of 12 months with unlimited hours or miles. There is no warranty for Off-Road and non-application specific vehicle installations.

BBB warrants our **100% NEW** turbochargers to be free from defects in material and workmanship at the time of sale to the original purchaser for a period of 3 years or 36,000 miles. New turbocharger units must have proper installation procedures performed as outlined by the OE Manufacturer including:

Warranty is void if the unit is improperly installed, or if the unit is damaged as a result of misdiagnosis of the vehicles turbocharger system.

Warranty applies only to catalog specific applications for personal use passenger cars, vans and light trucks. All fleet, commercial, heavy duty and industrial applications are warranted for a period of 12 months with unlimited hours or miles. There is no warranty for Off-Road and non-application specific vehicle installations.
