Material Safety Data Sheet

Page 1.

Material Safety Data Sheet AW Hydraulic Oil ISO 46

Section1. Chemical Product and Company Identification. Product Name: AW Hydraulic Oit ISO 46

Codo / Part Number: 9636, 9637, 9638,9616,11360

Manufacturer: SPX Fluid Power 5885 11th Street Rockford, IL 61109, USA Phone: 815-874-5556

CHEMTREC 24 Hr Emorgency Number: 800-424-9300

Material Use: The product designed for uso in heavy duty

Hydraulic fluid applications.

Validated on January, 2004

Section 2. Composition and Information on Ingredients.

Name: Hydrotroated or soverely refined base oil and proprietary additives CAS#: Mixture % (V/V): 100 Exposure Limits:

TLV-TWA (8hr): Smg/cubic m (oil mist) STLE: 10 mg/ cubic m (oil mist)

Manufacturer Recommendation: Not applicable

Othor Exposure Limits: Consult local, state, provincial or

territorial authorities for acceptable exposure limits.

Section 3. Hazardous Identification.

Potential Health Effects: Not irritating to slight irritation to skin and eyes with no permanent damage. Relatively non-toxic via ingestion. This product has a low vapor prossure and is not expected to present an inhalation exposure at ambient conditions. At high temperatures or mechanical actions may produce vapors or mists, inhalation may cause irritation of the breathing passages. See section 11.

Section 4, First Aid Measures

Eye contact: Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek medical attention.

Skin Contact: Romove contaminated clothing – launder before reuse. Wash contaminated skin with running water and non-abrasive scap, Get medical attention if irritation devolops or if product is injected under pressure into or under the skin.

Inhalation: Remove to fresh air, Get medical attention if breathing difficulty persists. If victim is not breathing, perform artificial respiration.

Ingestion: DO NOT induce vomiting. Seek medical attention.

Soction 5. Fire-fighting Measures

Flammability: May be combustive at high temperature.

Flash point: >=200 deg C (392 deg F) (COC)

Flammable Limits: Not available

Auto-Ignition Temperaturo: Not available

Fire Hazard in Presence of Various Substances: Low fire hazard. This material must be heated before ignition will occur.

Explosion Hazards in Presence of Various Substances: Do not cut, weld, drill or pressurize empty container. Containers may explode in heat of fire.

Products of Combustion: various exides of carbon, nitrogen, sultur, smoke and irritating vapors from incomplete combustion.

Fire Fighting Media Instructions; NAERG96, Guide 171, Substances (low to moderate hazard). If tank, rail car or tank is involved in tire, ISOLATE for 800 meters (0.5 mile) in all directions. Shut off fuel to fire if it is possible to do without hazard. If it is not possible, withdraw from area and let fire burn out under controllod conditions. Withdraw immodiately in case of rising sound from venting safety device or any discoloration of tank due to fire. Cool containing vessels

with water spray in order to prevent pressure build-up, auto ignition or explosion. Small fire: use DRY chemicals, team, water spray or CO2.

Large Fire: use water spray, tog or foam. For small outdoor fires, portable fire extinguishers may be used. For all indoor fires and significant outdoor fires solfcontained breathing apparatus is required. Respiratory and eye protection are required for fire fighting personnel.

Section 6. Accidental Release Measures

Material Release or Spill: NAERG96, Guide 171, Substances (low to moderate hazard). ELIMINATE ALL IGNITION SOURCES. Avoid contact, Stop loak if without risk. Contain spill. Absorb with inort absorbents. Place used absorbent in closed metal containers for later disposal or burn absorbent in auitable combustion chamber. DO NOT FLUSH TO SEWERS, STREAMS OR OTHER BODIES WATER. Check with applicable jurisdiction for specific disposal requirements of spilled materials and empty containers. Notity the appropriate authorities immediately.

Section 7. Handling and Storage.

Handling: Avoid inhalation and skin contact especially when handling used oil. Keep away from sources of ignition. Do not rouse empty containers without commercial reconditioning, Practice good personal hygione. Wash hands after handling oil and before eating. Laundor work clothes frequently, Discord saturated leather goods.

Storage: Store in tightly closed containers in cool, dry, isolatod, well-ventilated area, and away from incompatibles.

Section 8. Exposure Control / Personal Protection,

Engineering Controls: For normal application, spacial vantilation is not nocossary, if user's operations generate vapors or mists, use ventilation to keep contaminants below exposure limits. Make-up air should always be supplied to balance air removed by exhaust. Have eyewash station and sofety-shower close to workstation.

Personal Protection:

Eyes: Eye protection should be determined based on conditions of use. If product is used in application where splashing may occur, the use of calcity goggles and/or a face shield should be considered.

Mands and Body: Wear appropriato chemically protoctive gloves and wear appropriate clothing to provent skin contact.

Respiratory: NIOSH approved respirators should be used when airborne contamination is above exposure limits,

Feet: Wear appropriate footwear to prevent product form coming in contact with feet and skin.

Section 9. Physical and Chemical Properties,

Appearance. Physical State: Clear, Blue, Viscous Liquid Odor: Mild petroloum Viscosity: 41.4 – 50.6 cSt & 40 deg C Flash Point: >= 200 deg.C (392 deg. F) Vapor Pressure: Negligible at ambient temperature and precsure Specific Gravity: 0.875 kg/L @20 deg. C (68 deg.F)

Water solubility: Insoluble in water

pH: Not applicable

Section 10. Stability and Reactivity

Stability: Stable under normal handling and storage condition Hazardous Polymorization; Will not occur at normal working conditions. Incompatible Substances / Conditions to Avoid: Reactive with exidizing agents and acids.

Decomposition Products: Combustion can yield carbon, nitrogan, sulfur, physphorus, and zinc axides.

Material Safety Da	ta Sheet
AW Hydraulic Oil IS	0 46

Section 11. Toxicological information

Routes of entry: Skin and eye contact, inhalation, ingestion. Acute Lethality: Based on toxicity of components.

Acute oral toxicity (LD50): >2000mg/kg rat.

Chronic or Other Toxic Effects. Dormal Route: Prolonged or repeated contact may cause skin irritation characterized by dormatitis or oil acno.

Page 2.

Inhalation Route: Negligible breathing hazard at normal temperature. Elevated temperaturos or mechanical action may form vapors, mists or fumes. Inhalation of oil mists or vapors from hot oil may cause irritation of the upper respiratory track.

Oral Route: Low toxicity.

Eye Irritation / Inflammation: Ropeated or prolonged contact may cause irritation but not permanent damage.

Immunotoxicity: Not available.

Skin Sensitization: Not expected to be skin sensitizer.

Respiratory Tract Sensitization: Not expected to be respiratory tract sonsitizers, Carcinogenicity: This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by NTP, IARC, OSHA. Other Considerations: No additional remark.

Section 12. Ecological Information

Environmontal Fate: Not available. Persistence / Bioaccumulation Potential: Not available. BOD5 and COD: Not available. Product of Biodegradation: Not available. Additional Remarks: No additional remarks.

Section 13. Disposal Considerations

Waste Disposal: Spent/used/waste oil may meet the requirements of a hazardous waste. Consult your local or regional authorities. Preferred waste management priorities are: (1) recycle or reprocess, (2) incinerate with energy recovery, (3) disposal at licensed waste disposal lacility. Ensure that disposal or reprocossing is in complianco with government requirements and local disposal regulations.

Section14. Transport Information

TDG Classification: Not controllod under TDG (Canada). DOT Shipping Description. Not classified as hazardous. Special Provisions for Transport: Not applicable.

Section 15. Regulatory Information

This product is acceptable for use under the provisions of WHMIS-CPR. All components of this formulation are listed on the CEPA-DSL (Domestic Substances List).

All components of this formulation are listed on the US EPA-TSCA Inventory.

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all of the information required By the CPR.

This product is not known to contain any chemicals at reportable quantities that are listed on the SARA 313 and 40 CFR 372.

This product is not controlled under the HCS.
