ROUTES OF EXPOSURE

INHALATION of vapor or spray mist. EYE or SKIN contact with the product, vapor or spray mist.

Continued on page 2

EFFECTS OF OVEREXPOSURE

EYES: Irritation.

SKIN: Prolonged or repeated exposure may cause irritation.

INHALATION: Irritation of the upper respiratory system.

May cause nervous system depression. Extreme overexposure may result in unconsciousness and possibly death.

Prolonged overexposure to solvent ingredients in Section 2 may cause adverse effects to the liver and urinary systems.

SIGNS AND SYMPTOMS OF OVEREXPOSURE

Headache, dizziness, nausea, and loss of coordination are indications of excessive exposure to vapors or spray mists.

Redness and itching or burning sensation may indicate eye or excessive skin exposure.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

None generally recognized.

CANCER INFORMATION

For complete discussion of toxicology data refer to Section 11.

Section 4 -- FIRST AID MEASURES

EYES: SKIN: INHALATION: INGESTION:	Get medical attention. Wash affected area thoroughly with soap and water. Remove contaminated clothing and launder before re-use. If affected, remove from exposure. Restore breathing. Keep warm and quiet.				
Secti	ion 5 FIRE FIGHTING MEASURES				
FLASH POINT	LEL UEL				
102 F PMCC	1.0 6.0				
FLAMMABILITY CI	JASSIFICATION				
Combustible,	, Flash above 99 and below 200 F				
EXTINGUISHING N	1EDIA				
Carbon Dioxi	ide, Dry Chemical, Foam				
UNUSUAL FIRE AND EXPLOSION HAZARDS					
Closed containers may explode when exposed to extreme heat.					
Application to hot surfaces requires special precautions.					
During emergency conditions overexposure to decomposition products may					
cause a health hazard. Symptoms may not be immediately apparent. Obtain					
medical attenti	lon.				
	IGHTING PROCEDURES				
Full protect	tive equipment including self-contained breathing apparatus				
should be used.					
	may be ineffective. If water is used, fog nozzles are				

preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

530327	page 3
Section 6 ACCIDENTAL RELEASE MEASURES	
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED Remove all sources of ignition. Ventilate the area. Remove with inert absorbent.	
Section 7 HANDLING AND STORAGE	
<pre>STORAGE CATEGORY DOL Storage Class II PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE Contents are COMBUSTIBLE. Keep away from heat and open flam Consult NFPA Code. Use approved Bonding and Grounding proce Keep container closed when not in use. Transfer only to app containers with complete and appropriate labeling. Do not take Keep out of the reach of children.</pre>	dures. roved
Section 8 EXPOSURE CONTROLS/PERSONAL PROTECTION	
PRECAUTIONS TO BE TAKEN IN USE Use only with adequate ventilation. Avoid contact with skin and eyes. Avoid breathing vapor and Wash hands after using. This coating may contain materials classified as nuisance pa (listed "as Dust" in Section 2) which may be present at hazardo only during sanding or abrading of the dried film. If no speci are listed in Section 2, the applicable limits for nuisance dus TLV 10 mg/m3 (total dust), 3 mg/m3 (respirable fraction). OSHA (total dust), 5 mg/m3 (respirable fraction). VENTILATION Local exhaust preferable. General exhaust acceptable if the materials in Section 2 is maintained below applicable exposure Refer to OSHA Standards 1910.94, 1910.107, 1910.108. RESPIRATORY PROTECTION If personal exposure cannot be controlled below applicable 1 ventilation, wear a properly fitted organic vapor/particulate r approved by NIOSH/MSHA for protection against materials in Sect When sanding or abrading the dried film, wear a dust/mist re approved by NIOSH/MSHA for dust which may be generated from thi underlying paint, or the abrasive. PROTECTIVE GLOVES Wear gloves which are recommended by glove supplier for prot against materials in Section 2. EYE PROTECTION Wear safety spectacles with unperforated sideshields. OTHER PRECAUTIONS Intentional misuse by deliberately concentrating and inhalin contents can be harmful or fatal.	rticulates fic dusts fic dusts ts are ACGIH PEL 15 mg/m3 e exposure to limits. imits by respirator ion 2. spirator s product, ection

Section 9 -- PHYSICAL AND CHEMICAL PROPERTIES

PRODUCT WEIGHT SPECIFIC GRAVITY	8.67 lb/gal 1038 g/l 1.04
BOILING POINT	300 - 395 F 148 - 201 C
MELTING POINT	Not Available
VOLATILE VOLUME	58 %
EVAPORATION RATE	Slower than ether
VAPOR DENSITY	Heavier than air
SOLUBILITY IN WATER	N.A.
VOLATILE ORGANIC COMPOUNDS	(VOC Theoretical - As Packaged)
3.74 lb/gal 448 g/l	Less Water and Federally Exempt Solvents
3.74 lb/gal 448 g/l	Emitted VOC

Section 10 -- STABILITY AND REACTIVITY

STABILITY -- Stable CONDITIONS TO AVOID None known. INCOMPATIBILITY None known. HAZARDOUS DECOMPOSITION PRODUCTS By fire: Carbon Dioxide, Carbon Monoxide HAZARDOUS POLYMERIZATION Will not occur

Section 11 -- TOXICOLOGICAL INFORMATION

CHRONIC HEALTH HAZARDS

Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

Ethylbenzene is classified by IARC as possibly carcinogenic to humans (2B) based on inadequate evidence in humans and sufficient evidence in laboratory animals. Lifetime inhalation exposure of rats and mice to high ethylbenzene concentrations resulted in increases in certain types of cancer, including kidney tumors in rats and lung and liver tumors in mice. These effects were not observed in animals exposed to lower concentrations. There is no evidence that ethylbenzene causes cancer in humans.

IARC's Monograph No. 93 reports there is sufficient evidence of carcinogenicity in experimental rats exposed to titanium dioxide but inadequate evidence for carcinogenicity in humans and has assigned a Group 2B rating. In addition, the IARC summary concludes, "No significant exposure to titanium dioxide is thought to occur during the use of products in which titanium is bound to other materials, such as paint."

Section 12 -- ECOLOGICAL INFORMATION

ECOTOXICOLOGICAL INFORMATION

No data available.

Section 13 -- DISPOSAL CONSIDERATIONS

WASTE DISPOSAL METHOD

Waste from this product may be hazardous as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261.

Waste must be tested for ignitability to determine the applicable EPA hazardous waste numbers.

Incinerate in approved facility. Do not incinerate closed container. Dispose of in accordance with Federal, State/Provincial, and Local regulations regarding pollution.

Section 14 -- TRANSPORT INFORMATION

US Ground (DOT) May be Classed as a Combustible Liquid for U.S. Ground. UN1263, PAINT, 3, PG III, (ERG#128)

DOT (Dept of Transportation) Hazardous Substances & Reportable Quantities Xylenes (isomers and mixture) 100 lb RQ

Bulk Containers may be Shipped as (check reportable quantities): UN1263, PAINT, COMBUSTIBLE LIQUID, PG III, (ERG#128)

Canada (TDG)

May be Classed as a Combustible Liquid for Canadian Ground. UN1263, PAINT, CLASS 3, PG III, (ERG#128)

## IMO

Section 16 -- OTHER INFORMATION

This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR.

The above information pertains to this product as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to this product may substantially alter the composition and hazards of the product. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.
